

JOIN US FOR OUR **2024 ANNUAL MEETING**

June 20 – 23

THE BREAKERS — PALM BEACH, FL

FEATURED Speaker:

MICHAEL A. PIKOS, DDS

Dr. Pikos graduated from The Ohio State University Summa Cum Laude and Phi Beta Kappa, and with honors from The Ohio State University College of Dentistry. He completed an internship at Miami Valley Hospital and residency in Oral & Maxillofacial Surgery at the University of Pittsburgh, Montefiore Hospital.

He is a Diplomate of: American Board of Oral and Maxillofacial Surgery, American Board of Oral Implantology/Implant Dentistry, International Congress of Oral Implantologists and a Fellow of the American College of Dentists.

He is one of the first clinicians to recognize the relevance of Cone Beam CT and interactive CT technology for comprehensive diagnosis and treatment planning along with its implementation for implant based oral rehabilitation.

Dr. Pikos has extensive experience in hard and soft tissue procedures and has placed more than 30,000 implants since 1983.

He is the author of "Bone Augmentation in Implant Dentistry" and has lectured extensively on dental implants throughout the world.

Dr. Pikos is founder and CEO of the Pikos Institute. Since 1990 he has been teaching advanced bone and soft tissue grafting courses along with full arch immediate reconstruction courses with alumni that now number more than 6000 from all 50 states and 67 countries. Dr. Pikos maintains a private practice which is limited exclusively to implant surgery in Trinity, Florida.

Regenerative Strategies 2024: Single Tooth to Full Arch Reconstruction

4 Hours of CE Lecture, Subject Code 690

LECTURE ONE COURSE OVERVIEW

This clinical based presentation will cover current hard and soft tissue grafting protocols for single tooth to full arch reconstruction. The use of 3D digital planning and diagnostic protocols will be featured along with comprehensive case presentations. After this presentation course attendees will understand the:

- Importance of 3D Diagnostics for implant based reconstruction
- Role of recombinant proteins and other bioactive modifiers for hard and soft tissue grafting
- Synergy of hard and soft tissue grafting for alveolar ridge reconstruction

The Severely Atrophic Maxilla and Mandible 2024: Full Arch Immediate Implant Reconstruction Strategies

4 Hours of CE Lecture, Subject Code 690

LECTURE TWO COURSE OVERVIEW

This presentation will focus on foundational principles for the treatment of the severely atrophic maxilla including the use of zygomatic and pterygoid implants for full arch immediate implant reconstruction. It will include the use of photogrammetry and a complete digital based restorative workflow.

After this presentation attendees will understand the:

- Importance of a prophylactic approach to full arch immediate implant reconstruction of the severely atrophic maxilla and mandible
- Use of zygomatic, pterygoid and conventional implants for treatment of the severely atrophic maxilla and mandible.
- Use of the mandibular tripodal subperiosteal implant as a treatment strategy for the severely atrophic mandible
